

## ■ Nokia Audio Adapter AD-46

The AD-46 audio adapter allows you to connect stereo headphones (with the standard 3.5-mm plug) to the Pop-Port™ connector of your compatible Nokia phone. The adapter allows you to listen to the FM radio or music player of your Nokia phone with your headphones or to answer or end a call. Read also the user guide for your phone, which provides important safety and maintenance information.

To use the adapter, plug the cable of the adapter into the Pop-Port connector of your compatible Nokia phone, and plug your headphones into the connector at the top of the adapter. The adapter supports 16-ohm or higher impedance headphones.

To answer or end a call, press the call key . If your phone supports voice dialing with this device, press and hold the call key when no call is in progress, and proceed as described in the user guide of your phone.

During a call, speak into the microphone at the upper right hand corner of the call key.

To adjust the volume, use the buttons at the side of the adapter (if this feature is supported by your phone) or use the phone keys.

To attach the adapter to your clothing, use the clip at the back of the adapter.

The crossed-out wheeled bin means that within the European Union the product must be taken to separate collection at the product end-of-life. Do not dispose of these products as unsorted municipal waste.
