

Nokia Data Suite Quick Guide

Issue 1

Nokia Data Suite is a set of PC applications developed for use with your Nokia 6088 or Nokia 7088. With Nokia Data Suite, you can transfer files (for example, images, videos, tones, recordings) from your device to a compatible PC.

Hardware and software requirements

- A compatible PC that runs on Microsoft Windows XP/2000
- A compatible Nokia mobile phone (Nokia 6088 or Nokia 7088)
- Nokia DKE-2 cable or similar data cable, and a compatible port in the computer
- Internet Explorer 5.0 or later version installed on your PC
- At least 150-250 MB of free disk space

Install Nokia Data Suite

Before using Nokia Data Suite, you must install it on your PC. To install Nokia Data Suite, download the installation files from Nokia website www.nokia-asia.com/6088/support or www.nokia-asia.com/7088/support to your PC, and do the following:

1. Connect your device to the PC with a compatible USB cable and switch the device on.
2. Exit all Windows programs before installation.
3. Double click Setup.exe to run the installer.
4. In the License Agreement window, read through and accept the License Agreement by clicking **Yes**.

If you do not accept the agreement, you cannot use the program.

5. Click **Next** to install the program to the default folder, or click **Browse...** to define another destination folder on your hard disk.
6. Follow the instructions on the screen, and click **Continue Anyway** to proceed the installation when a warning message pops up.

7. Select **Finish** to complete the setup.
8. Restart your computer.

Uninstall Nokia Data Suite

You can uninstall Nokia Data Suite when you do not use it any more.

1. In the Windows system, select **Start > Control Panel**.
2. Double click **Add/Remove Programs**.
3. From the list of **Current Installed Programs**, select **Data Suite**.
4. Click **Remove**.
5. Follow the instructions on the screen until the program files are removed.
6. Click **Finish** to complete the uninstallation.

Use Nokia Data Suite

To use Nokia Data Suite, do the following:

1. Connect your device to PC with a compatible USB cable.
2. Launch the application of Nokia Data Suite.
3. To set COM port, select **Setting > Ports, COM Port Configuration** dialog box displays.
4. Press **Add** button, and add the COM port assigned to Data Suite. Press **Save&Exit** to save the COM port and exit the dialog box.

If you are not sure which COM port to use, do the following:

- In Windows XP/2000, right click **My Computer** and select **Properties**.
- In the **System Properties** window, select **Hardware** tab.
- Press on **Device Manager** button, and **Device Manager** window displays.

- Click the + sign to the left of **Ports (COM & LPT)** to expand it.
- Check and view the COM port assigned to Data Suite.

5. In the drop down list of **Port Select**, select the COM port assigned to Data Suite.

6. Click **Connect** to start the handshake between PC and your device.

Once the handshake is successful, the red light changes to green, and the program lists the top level file folders on the PC and device side.

Only English and Spanish languages are supported. To change the language, click **Language**.

7. Two windows are displayed. The left window shows the local disk drives on the PC, and the right window shows the folders in your device.

The folders **Images, Video clips, Recordings, Clip-arts, Frames, Screen saver, Wallpapers, Alert tones, Ring tones** in device can be viewed, and only the files in these folders can be transferred.

Transfer files with Data Suite

Copyright protections may prevent some images, music (including ringing tones), and other content from being copied, modified, transferred or forwarded.

With Nokia Data Suite, you can transfer files like image, video clip, tone and recording from your device to a compatible PC. To transfer one or more files, do the following:

1. In the right window of the program screen, click the + sign to the left of the folder you want to expand, and select one or more files you want to transfer.

2. In the left window of the program screen, locate the folder in which you want to store these files.
3. Press the left-arrow button between the left and right windows.
4. The file transfer starts, you can view the transfer progress on the status bar at the bottom of the window.
5. After transferring all files, click **Exit** to exit the program.
